Our carpet is typically made from superior quality swmiworsted wool. Worsted wool is obtained from special breeds of longhair sheep. These long hairs are used to produce a smoother, higher quality yarn.

PLY : this is the number of single strands of spun yarn twisted together to form the finished yarn. Standard cut pile uses a very fine yarn that gives a more durable smooth, velvet finish. A coarser, nubbier look can be obtained by using a high ply yarn.

PILE WEIGHT : This is the weight of the wool (yarn) used in one square yard of hand tufted carpet

PILE HEIGHT : The height of the pile yarn above the backing

TOTAL WEIGHT : The combined weight of the yarns and all backing materials.

TEXTURE : Hand tufted carpet can be produced in cut pile, loop pile or a combination of the two.

FINISHING : Once a carpet is produced a carving or tip shearing finishing techniques can be applied.

TIP SHEARING : This technique is used on loop pile areas of a carpet, tip shearing randomly shaves off top portions of the loop exposing tip fibers. The fiber tips reflect less than the loops thereby making them a shade darker. This adds color tones and depth to the look of a carpet.

CARVING : It can be very shallow (hairline) or deep assing dimension and definition to a carpet

Backing System.

Content : 100% Wool, Wool/Nylon, Wool/Silk
Width : up to 39' unseamed
Number of Colors : as specified (unlimited)
